To,
Iptikar Publishing and Distribution
U.A.E, Abu Dhabi, Al Falah Street, Al Qusaily Tower, Building No.8, M3 Floor

Dear Sir,

In the reference to I would like to request to you as we had mentioned that we required to have another Fron-End Specialist. Therefore I have attached all the job responsibilities and skill that Is required for the position.

Experiences that is required for the position
3 to 5 Years of Front End Development Experiences
Proficient understanding of web markup, including HTML5, CSS3, Javascript, Jquery, JSON
Basic understanding of server-side CSS pre-processing platforms, such as LESS and SASS
Proficient understanding of client-side scripting and JavaScript frameworks, including jQuery
Expected to have a proficient knowledge of JavaScript, while most front-end developers should know jQuery.
Good understanding of {{Depending on the specific case, a developer should have the knowledge of advanced JavaScript libraries and frameworks, such as AngularJS, KnockoutJS, BackboneJS, ReactJS, DurandalJS etc.}}
Good understanding of asynchronous request handling, partial page updates, and AJAX
Familiarity with tools such as as Gimp or Photoshop is a plus.
A UI/UX designer is expected to deliver finished resources for the developer to incorporate into the app. However, quite often a front-end web developer needs to make some small adjustments.
Proficient understanding of cross-browser compatibility issues and ways to work around them.
Proficient understanding of code version tools, such as {{Git}}
Good understanding of SEO principles and ensuring that application will adhere to them.
Experiences with Linux environment (Ubuntu/ Centos)
Very good knowledge in UI frameworks such as Bootstrap, Foundation, etc.
Write UI/UX which Google do not hates
